SERVICE ENGINEER

Are you looking for a challenging fulltime job as a Service Engineer? Are willing to work hard and provide a great service to our customers? In that case we are looking for you!

The Company: **STYLE CNC Machines** is situated in the Netherlands and is already producing STYLE CNC lathes and milling machines for over 30 years. We have already sold over 2000 machines in Europe. The unique selling point of our company is that we have developed our own unique STYLE control. Because of our own control we have a unique position in the market as a machine builder. As a manufacturer we control the complete chain from the absolute start to building a complete machine. Quality & reliable service are our keywords! Our machines are specially made for companies who are producing single pieces and small series. Of course also bigger series can be perfectly made on the STYLE machines. Because we are manufacturer we can fulfill all the special custom made wishes. This flexibility is for a lot of customers very important and is a strong capability of our company. **STYLE CNC machines** has branch offices in The Netherlands, Belgium, Czech and Poland.

The Opportunity: The Engineer is responsible for the services on the install base(+/- 80 machines), installation and commissioning of new machines, give course off the control after the installation, repair, demonstrations for new customers, help by sales and on exhibitions. Help customers and colleagues. You work in nice team, a sort of family, and can always fall back on your colleagues in Poland, Czech and the Netherlands.

Essential Duties and Responsibilities

- Install and commissioning machines at the customers.
- Help the customer with their questions.
- Machines warranty inspections.
- Organize work and plan activities for most effective way.
- Maintain the machine at the customers.
- Train new customers to work with the STYLE control.
- Spare parts management.
- Present and demonstrate STYLE products to potential customer.
- Willing to travel if needed. (Poland)

Required Skills:

- Proactive attitude.
- Willing to learn. Not afraid to try, open minded.
- Knowledge from electro and mechanical.
- Technical school graduation.
- Can read technical drawings and schematics.
- Valid and current driver's license required
- Knowledge of installation software on PC.
- Language: English (written and spoken) and Polish

Nice to have Skills:

- Knowledge from the machine tools industry.

- Experience with turning and milling and tools used in that processes.
- Proficient computer skills; Knowledge with MS Office, CRM program.
- SEP license.
- Familiar with FANUC controller.

Offer:

We at STYLE are a young team of driven, creative and independent professionals. STYLE Employees enjoy a stable and a very pleasant work environment from a company with years of success and growth in the machine tool industry. We offer competitive pay, generous benefits and ongoing training, also all necessary tools to do the job. We work as a team.

Please submit your resume in English. We are looking for person from śląskie, małopolskie or opolskie vovoideships.
